Links explanation

The **Fixed width** link scales the project to fit the width of the window, and the **Responsive** link will allow you to zoom-in and move around the project, but also make it harder to see an overview of the entire project. This value could also be adjusted in the top right:

The GitHub link is only as a backup, in the unfortunate case that the Figma servers are down. If that happens, please open the project in Figma to allow for the interactions to work.
